Navigating Through Troubled Waters; Current Trends in International Maritime and Energy Insolvencies

Navigating Through Troubled Waters; Current Trends in International Maritime and Energy Insolvencies

Following the financial 2008 crisis, both the Maritime and Energy sectors have been seriously and adversely affected, resulting in remarkable cross-border insolvencies of large or leading corporations in the field. The Seminar will be devoted to the study and analysis, from a multi-jurisdictional perspective, of the whole spectrum of multinational insolvencies procedures, paying special attention to a pragmatic approach of the matter and to real-life situations.
